

Visit a Movie Set

By Erica Mariola

Have you ever wondered how movies are made? It can be very fun but also hard work. The production of a movie is all the work that goes into making the movie. It can take months or even years to make movies.

A movie set is a place where the movie is being filmed or recorded. Movie sets can be in the real world like at a restaurant or a house. The actors are on the set and the movie crew is filming them and recording them with cameras.

Movie sets can also be built in a studio by artists. For example, if a movie takes place in space a movie set can be built to look like a different planet. All kinds of creative people and artists work on movie sets. If you could make a movie what kind of movie set would you build?
